Town of Hampton, New Hampshire

Capital Improvement Plan – Public Works Department

Sewer Collection System Improvements

Projected Cost –	2014	$325,000
	2015	$2,000,000
	2016	$2,000,000
	2017	$3,000,000
	2018	$3,000,000

This project would include engineering and construction to replace and/or repair the sewer collection system. The existing system is allowing over 500,000,000 gallons of infiltration into the sewer system that must be treated.

A plan for improvements will be developed subsequent to the proposed Infiltration and Inflow study and sewer collection system mapping project.

The above figures are rough estimates that need to be refined.
