

Hampton Conservation Commission

March 10, 1973

Nelson Grant, Irene Palmer, Stillman Hobbs, Ruth Stimson, and Ruth Nutter met at the home of Chairman Peter Randall, for a short business meeting.

A letter to the House Committee on Resources, Recreation and Development:

Senate Committee on Resources and Environmental Control; concerning our interest in the passage of Senate Bill 1, urging the establishment of a Department of Environmental Control, was signed by all present.

A second letter, from "SPACE", on the New Hampshire Environmental Action Platform for 1973 was read by the members.

Stillman Hobbs made the motion that our Commission send ten dollars to "SPACE", and Ruth Nutter seconded the motion, which was carried.

Peter spoke of the continued filling of the marshes by the Battcocks, and presented a letter to the Selectmen, requesting that their latest request be denied. This was signed by all members present except Nelson Grant.
