

Hampton Energy Committee (“HEC”)

Meeting Notice: Thu 12 Dec 2013 at 7 pm in Board of Selectmen’s Room

Program Agenda

Steve Condon of Revision Energy, a Hampton resident, will offer his views on the uses and advantages of solar power to conserve energy and reduce carbon emissions for municipal buildings, businesses and residences.

The public is invited to join with HEC members for the discussion, with your, questions and concerns – eg: costs vs benefits, pros & cons, rebates, tax credits, how to proceed, etc.

Possible Discussion Areas:

Solar Grid - the Beach Police and Fire Stations

Solar Grid – the Waste Water Treatment Plant, DPW & pumping stations

Solar Grid - SAU 90 (3 Schools), Library, Town Hall, Fire Station (HQ)

Solar Grid – SAU 21 Since the HS is regional, each town would have to approve a project

HEC has been told there is RGGI money available with 0% loans for energy saving projects for municipal buildings. Those savings can be used to pay back the loan.
