

PUBLIC NOTICE

Mosquito Control

The Mosquito Control program begins April 10, 2006 in the Town of Hampton. Crews will be checking swamps, woodland pools, ditches, salt marshes, storm drains and other shallow, stagnant water for mosquito larvae. When mosquitoes are found, the following insecticides may be used: VectoBac (*Bacillus thuringiensis israelensis*), Altosid (methoprene), Agnique (poly-isooctadecyl-hydroxyl) and Abate (temephos). In Hampton a truck mounted sprayer will disperse sumithrin along roadways. Road spraying may begin in early June. It is not possible to predict the schedule for road spraying in advance. The spray schedule is based upon mosquito surveillance data, weather conditions, and funding.

Residents who do not want their property treated must contact Dragon Mosquito Control in writing at P.O. Box 46, Stratham, NH 03885. Otherwise, control measures may be done on your property if needed. Residents may call 964-8400 for more information on spray dates, location, materials used, precautions or other concerns including EEE and WNV. Sarah MacGregor, President, Dragon Mosquito Control.
