

Town of Hampton, New Hampshire

Capital Improvement Plan – Public Works Department

WWTP Upgrades Phase 5 Projected Cost 2016 - \$930,000

Odor Control – 2

In October 2011 the Town contracted with GHD, Inc. for an Odor Control Study. They identified improvements that could be made at the WWTP that could be done in several phases. Phase 2 would seek to control the odors from the Pump Station Wet Well, Grit Removal Building, Screenings Building and the Mixed Sludge Tank.

The solution recommended would be an Activated Carbon System to be located just north of the Screenings Building.

Project Cost:	Physical Improvements	\$700,000
	Engineering & Permitting	<u>\$230,000</u>
Total =		\$930,000
