

## New Playground/Replacement- Kids Kingdom

The Kids Kingdom playground is located on Park Avenue between Eaton Park and Tuck Field. That playground was built in 1996 and has stood up very well in this weather. It is, however, extremely popular and parts of it are made of wood so it is time to start thinking of replacing pieces. I am adding this playground onto the CIP because it makes sense to replace the playground all at one time so residents are not without the playground for a significant amount of time. It is the premiere playground of our Town and does get used during all seasons. The playground cost \$80,000 to purchase in 1996. The figure below shows that replacement cost of that playground today. As the years have passed the company has updated their equipment to stay current with safety standards and trends so the playground is not completely apples to apples in regard to the materials used for the equipment. As far as each piece of equipment goes, the playgrounds are the same. It is my hope to write a warrant article using the monies earned from the 20% parking lot revenues and adding to that amount the extra needed to complete the project.
