Capital Improvement Plan – Public Works Department

Storm Water System Improvements

|                       |             |
|-----------------------|-------------|
| Projected Cost – 2013 | \$290,000   |
| 2014                  | \$314,000   |
| 2015                  | \$924,000   |
| 2016                  | \$1,029,000 |
| 2017                  | \$964,000   |
| 2018                  | \$1,184,000 |

This project would include engineering and construction to replace and/or repair the storm drainage system including the cost to provide connections to properties that discharge basement water into the sewer system.

A plan for improvements will be developed subsequent to the proposed Infiltration and Inflow study and storm drain mapping project.

The above figures are rough estimates that need to be refined.
