[NHDES Standard Dredge & Fill](#)

This project proposes 2,517 sq ft of temporary impacts to grade a sloping lawn to make it flatter. All impacts are to previously developed upland buffer zone (lawn). The proposed grading will not change the directions of the surface runoff towards any abutters. A 200 sq ft area of native shrub plantings are proposed to provide mitigation. All work is outside of the 50 ft primary setback and no trees exist in the 100 ft tidal buffer zone.
